

Case Study

Parking Lot Repair

BEFORE

AFTER

This was a water pipe that was leaking and it would have cost around \$4,000 for an asphalt company to fill the hole and patch it. The in-house maintenance team did the work in 4 hours with \$800 of product. The warranty on the product is 3 years. This eliminated the need for a temporary cold patch and saved on time and cost of bringing in an asphalt contractor.
